To Whom It May Concern,

Executive Construction Services, based out of Illinois, came into the New York market with the purpose of finding a construction management company that could represent them in this area with the purpose of building multiple fitness and health centers. We have been extremely happy with our selection of Aurora Contractors Inc. Aurora completed our first New York XSport Fitness, a 70,000sf basement fit out underneath two existing tenants in the Roosevelt Field Mall which was completed on time and within budget. The conversion of a damp concrete basement to a high end gym with a basketball court, full service spa, tanning rooms, aerobics and yoga rooms, cardio and free weight areas, a juice bar and an elegant lap pool with faux finishes and over 100 wall mounted plasma televisions was just incredible.

This project had some logistical challenges which Aurora executed conscientiously and efficiently. One of these challenges was to remove the existing electrical service, while not interrupting the service to the two tenants above our space. Aurora installed a new service which now includes our space with no impact on the daily operations of both of the tenants above. Another major challenge on this project was to remove six structural concrete columns in the middle of our space and install twelve new steel columns to allow for a basketball court to be installed below the existing slab elevation. Once again Aurora and their subcontractors rose to the challenge and executed this task safely and without effecting the operation of the tenants above.

I would strongly recommend Aurora Contractors for any challenging and future projects you may have.

If you have any questions, or if I can be of further assistance please feel free to call me. I can be reached at the above number and/or 770.300.8300 (Cell).

Sincerely,

Michael Roberts
