Re: Aurora Contractors Inc.
Oct. 2020

To Whom it May Concern,

I am pleased to write this letter of recommendation for Aurora Contractors, Inc., who was the Design/Build Construction Manager for our Long Island distribution and office center in Central Islip, NY. At the time I was Sr. Project Manager in our construction group and worked directly with Aurora Contractors, from design through delivery of the project.

Our Central Islip project consisted of a 420,000sf, state of the art distribution center, including over 200,000sf of cooler and freezer space, running as low as -19 degrees Fahrenheit. Aurora's ability to coordinate and manage the project in conjunction with all of Sysco's vendors, including Ammonia Refrigeration, Hydrogen, General Racking, and Automated Racking, etc. was instrumental to the project's success.

Aurora's flexibility, experience, problem-solving attitude, as well as cost and schedule certainty, was an intricate part of the team in delivering the project as efficiently and effectively as it was.

Sysco would happily work with Aurora Contractors again in future endeavors.

Sincerely,

Peter Richter
